

Architectural Monitors

Tantra Architectural Monitors are the ultimate in high-performance music and theater sound reproduction. Featuring state-of-the-art drivers and electronics, these speakers will produce every nuance of the music and movie soundtracks you enjoy everyday.

Loudspeaker technology is both an art and a science. Using the finest components is only the beginning. Our world-class engineers have a pedigree that is unmatched in the industry and they are responsible for literally millions of loudspeakers in use around the world today. Given the challenge of producing the finest in-wall and in-ceiling speakers available anywhere, they have blended the latest technology with the best in old-world craftsmanship and created fully enclosed cabinet speakers that mount flush into the wall or ceiling. This allows you to enjoy music filled with the impact and dynamics of a live performance while the speakers themselves are completely hidden from view.

We invite you to review the details and specifications of the various Tantra models, but keep in mind: the magic lies in the outcome. Once your system is complete, you will hear the results of all this incredible effort to make your home entertainment experience something more real, more exciting and more emotional than you ever thought possible.

Tantra - pure consciousness through pure audio
