

Cinema Monitors / Cinema Subwoofers

Sleek and refined, powerful and precise, the Tantra Cinema Monitors are designed to deliver an amazing audio experience with a sculptural appearance. Available in several models, the Cinema Monitors are the perfect compliment to any flat panel display. They can be mounted on the wall or attached to available dedicated stands for placement in a wall-unit or directly on the floor. Regardless of how they are installed, the Cinema Monitors are an attractive addition to any environment.

Of course, all of this refined beauty is irrelevant if the Cinema Monitors couldn't fill a room with astounding sonic fidelity. From their extruded aluminum enclosures to their hand built drivers and advanced crossovers, these speakers are guaranteed to impress. They will provide you with the tonal precision and accuracy that will allow you to forget you are listening to an audio system and instead simply lose yourself in the music or movie of your choice.

In places where space is limited or to simply make a system more compact, the Tantra CinemaStick gives you three front-channel speakers in a single enclosure. Designed to mount on wall below a flat panel display or on top of a standard television, the CinemaStick features three independent coaxial speakers each in their own vented enclosure.

As so many flat panel monitors today utilize articulating mounts, Tantra has for you the available CineMount. The CineMount is an articulating bracket that allows the CinemaStick to pivot into the identical position of the flat panel display above it.

Tantra - pure consciousness through pure audio
